

Evoluta

Nasce con Evoluta Synchro Digit Piemme™: la Superficie con Struttura Digitale Sincronizzata Piemme capace di esprimersi in varianti illimitate che innalzano lo standard qualitativo dell'intero settore ceramico. La superficie tridimensionale non è più formata per pressatura ed è quindi libera dai vincoli ripetitivi dei classici stampi per ceramica; inoltre è perfettamente sincronizzata con l'andamento della grafica di superficie.

Evoluta marks the launch of Synchro Digit Piemme™: the Piemme synchronized digital structure surface capable of expressing itself in unlimited variants that raise the quality standard of the entire ceramic industry. The three-dimensional surface is no longer formed by pressing and is therefore not limited by the repetitive constraints of classic ceramic moulds; it is also perfectly synchronized with the surface graphic pattern.

In Evoluta zeigt sich zum ersten Mal Synchro Digit Piemme™, die mit synchronisierter digitalen Struktur Oberfäche Piemme, die durch die Eröffnung unbegrenzter Gestaltungsvarianten den Qualitätsstandard der gesamten Keramikbranche anhebt. Die reliefierte Oberfläche wird nicht mehr durch Pressung erzielt und ist deshalb auch nicht an die Wiederholungsmuster der klassischen Formpressen für Keramik gebunden. Sie ist auch mit den Oberflächengrafiken vollkommen synchronisiert.

Evoluta marque la naissance de Synco Digit Piemme™, la surface avec structure synchronisée numérique Piemme, dont les variantes illimitées permettent une expression qui vient rehausser les normes de qualité de tout le secteur de la céramique. La surface tridimensionnelle n'étant plus formée par pressage, elle est désormais libérée des contraintes répétitives imposées par les moules pour céramique classiques. Par ailleurs, elle est parfaitement synchronisée avec l'évolution des éléments graphiques de la surface.
