

BASALTINA STONE PROJECT

LEA
CERAMICHE

Quella dura potenza, intrinseca alla pietra.

**La forza della terra si cristallizza
in una pietra lavica.**

**La basaltina, fatta di calore,
ceneri, gas, energie millenarie.
Il suo grigio naturale rivive oggi
nella ceramica, acquistando toni
e sfumature nuove. Riempie gli
spazi con gusto e discrezione; ogni
venatura trattiene una storia.**

The hard, intrinsic power of stone.

**The power of earth crystallizes
in lava stone.**

**Basalt rock, made of heat,
ashes, gas and energies
thousands of years old. Its
natural grey comes back to
life again in ceramics, taking
on new tones and variations. It
fills spaces with subtle style, as
every vein holds a story within.**

Le rappresentazioni fotografiche e descrittive dei prodotti di Lea Ceramiche riportate sui depliant, sui cataloghi e sugli altri materiali pubblicitari dell'azienda, sono puramente illustrative dello specifico prodotto rappresentato. Si precisa infatti che, successivamente alla pubblicazione dei materiali pubblicitari dell'azienda, il prodotto potrebbe subire leggere modifiche nel relativo processo produttivo, al fine di renderlo tecnologicamente migliore. Tali aggiustamenti tecnologici potrebbero determinare lievi differenze, anche estetiche e/o cromatiche, nel prodotto medesimo, con la conseguenza che lo stesso potrebbe risultare diverso da come rappresentato e/o illustrato e/o descritto nel materiale pubblicitario di Lea Ceramiche. Tali differenze non potranno essere in alcun modo considerate dall'acquirente un vizio e/o difetto del materiale ceramico stesso, bensì una caratteristica dello specifico prodotto. Tutti i materiali ceramici che imitano pietre naturali presentano differenze di colore e sfumature che non potranno in nessun modo essere considerate quale difetto del prodotto, ma bensì una qualità caratteristica di tali tipi di produzione.

The photographs and descriptions of Lea Ceramiche products given in the brochures, catalogues and other corporate advertising materials aim merely to represent the specific products. After the publication of the corporate advertising materials, the products may be slightly modified as a result of technological improvements. Such technological modifications may lead to slight differences in appearance and/or colour of the products, which may therefore differ from the representations, illustrations or discriptions given in the Lea Ceramiche advertising materials. Such differences shall in no way be deemed to be faults and/or defects in the ceramic materials, but rather intrinsic features of the specific products. All ceramic materials that imitate natural stone differ in color and nuances, and this cannot any in way be considered as a product defect, but rather a characteristic of these types of products.
